

Your Church

is invited to apply for
an empty tomb® , inc.

Mission Match® Matching Contribution!

On the following pages are the 40 countries that need
extra help to reach their target goal to reduce the number of
children under age five who are
dying from treatable causes.

Is your church or denomination already involved in
medical missions in one of these countries?

Does someone in your church have a connection to
one of these countries?

Doing **one** project in **one** country can be your church's part in a
bigger picture. Together, we can be part of a nationwide
movement of Christians who are increasing help, in Jesus' name,
for these little children at risk of dying from treatable causes.

We look forward to the possibility of
changing the world in Jesus' name with you
through empty tomb's Mission Match!

The table numbers on the next pages show the annual Actual and Reduction Goal (R-Goal) rates of under-age-5 child deaths per 1,000 live births for 40 countries. In 2015, world leaders set the 2030 reduction goal of 25 deaths per 1,000 live births for each country. These countries needed extra help as of 2015 to meet the 2030 reductions goals set. The table R-Goal numbers show each country's annual rate calculated, based on Year 2000, to reach that R-Goal by 2030. Note: If countries on the list of 40 countries as of 2015 meet or exceed an interim R-Goal, it makes sense to keep momentum going so that those countries also reach or exceed their 2030 R-Goal.

We can do intentional miracles in Jesus' name!

This child was near death.

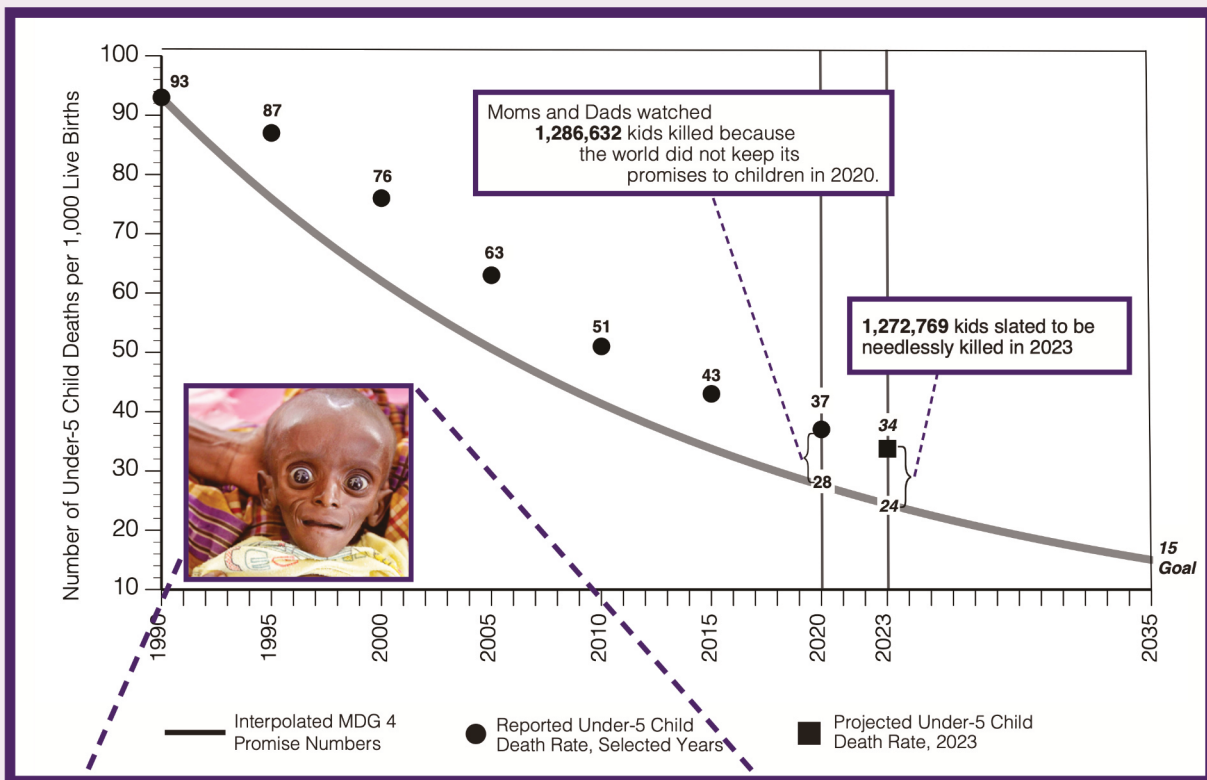

12 days later, he had been restored to health!

We can do similar intentional miracles for the children who will otherwise die from treatable causes in 2023.

See missionmatch.org or email missionmatch@emptytomb.org

July 26, 2011

On 7/26/2011, Minhaj Gedi Farah was admitted to the International Rescue Committee field hospital in the Eastern Kenyan village of Hagadera near Dadaab. He weighed 3.4 kg (7 lb 8 oz). (AP photo by Schalk van Zuydam)
On 8/6/2011, he weighed 3.8 kg (8 lb 6 oz). (AP photo by Jerome Delay)

August 6, 2011

This Somali child's mother was able to reach a hospital in Kenya. The seven-month old baby responded to the medical assistance provided. The church in the U.S. has the potential to increase giving in order to help close the child death gap between the actual rate and the goal target, thereby helping millions of children (see Chapter 6).
